- ▶ *Sand Blasting*
- ▶ *Assembly*
- ▶ *Parts Cleaning & Washing*
- ▶ *Rust Removal & Prevention*
- ▶ *Citric Passivation*
- ▶ *Descaling*
- ▶ *Powder Coating*
- ▶ *Sorting*
- ▶ *Honing*

If You Do Your Own Deburring, Buy Your Supplies from Us

Rosemont Compounds & Soaps

Mechanical Finishers acquired the exclusive right to manufacture Rosemont Industries Finishing Compounds.

Liquid Burnishing Compound (R-20-L)

A general purpose compound which may be used on all metals. Develops a natural color on all metals producing a clear brilliant look. Inhibits rusting and conditions water.

Liquid Burnishing Compound (R-30-L)

Used on ferrous metals and plastic parts. May be used with all media types. Very free rinsing, suspends soils, and conditions hard water.

Liquid Rust Preventative (R-51-L)

Used in tumbling barrels, vibratory systems, or as a final rinse. It is odorless, non foaming, and transparent to permit the ability to work; non-gummy, non-sticky, and is not subject to bacterial decomposition or rancidity.

Liquid Steel Ball Burnishing and Rust Removal Compound (R74-L)

Used with all media and on all metals. Especially suitable for steel ball burnishing and keeps media clean. When used in higher concentrations it will remove rust from steel parts.

Low Foaming Liquid Burnishing Compound (R-215-L)

A liquid general purpose low-foaming compound which may be used on all metals. Develops a natural color on all metals producing a clear brilliant look. Inhibits rusting and conditions water. Suspends soils.

Proven performers used in our own facilities are available for sale. Our knowledgeable staff can help suggest the right compound and media for your applications.

Liquid Cleaning and Descaling Compound (MFI-527)

Acidic descaling compound designed for removing tough and heavy scaling on all types of metals and alloys. Reduces Hydrogen Embrittlement risk. Can be used as a bleaching agent.

Liquid Cleaning Compound (MFI-200)

Used on all metals and plastics for general purpose cleaning. Excellent at removing greases and oils. Can be used with all types of media to suspend solids and oils. Conditions hard water.

Mechanical Finishing Media

Polishing Aggregate, Ceramic & Plastic Media

"We liked them so much we bought the company."
